

GEN 3.2 AERONAUTICAL CHARTS

1. RESPONSIBLE SERVICES

The Department Civil Aviation of Malaysia provides a range of aeronautical charts for use by all types of civil aviation. The Aeronautical Information Services produces some of the charts which are part of the AIP.

The charts published in the AIP are produced in accordance with the provisions contained in the ICAO documents listed below:

Annex 4 -	Aeronautical Charts.
DOC 8168 OPS/611 -	Aircraft Operations Vol II.
DOC 8697 AN/889 -	Aeronautical Chart Manual.

2. MAINTENANCE OF CHARTS

- 2.1 The Aeronautical charts included in the AIP are kept up to date by means of necessary replacement sheets. Significant amendments or revisions in aeronautical information to other aeronautical charts are also included in the replacement sheets. Revision of the aeronautical information on all charts is constantly in progress and amended reprints are published as regularly as production resources permit.
- 2.2 Items of information found to be incorrect after publication will be corrected by NOTAM if they are of operational significance.

3. PURCHASE ARRANGEMENTS

The charts as listed under paragraph 5 of this subsection may be obtained from:

Aeronautical Information Services
Department of Civil Aviation Malaysia
Level 4, Podium Block B,
No. 27, Persiaran Perdana,
Precinct 4,
62618 Putrajaya,
Malaysia.

Tel: 603 - 88714000
Fax: 603 - 88810530
AFS: WMKKYAYS

4. AERONAUTICAL CHART SERIES AVAILABLE

- 4.1 The following series of aeronautical charts are produced:

- a) Aerodrome Chart - ICAO
- b) Aerodrome Obstacle Chart - ICAO Type A (for each runway)
- c) En-Route Chart - ICAO
- d) Standard Departure Chart - Instrument (SID) - ICAO
- e) Standard Arrival Chart - Instrument (STAR) - ICAO
- f) Instrument Approach Chart - ICAO (for each runway and procedure type)

The charts currently available are listed under para 5 of this subsection.

4.2 General Description Of Each Series

a) Aerodrome Chart - ICAO

The chart provides flight crews with information that will facilitate the ground movement of aircraft to and from the runways and apron and to portray the major flight operation facilities at the aerodrome.

b) Aerodrome Obstacle Chart - ICAO Type A (operating limitations)

This chart contains detailed information on obstacles in the take-off flight path areas of aerodrome. It is shown in plan and profile view. This obstacle information, provides the data necessary to enable an operator to comply with the operating limitations of ICAO Annex 6, parts I and II, Chapter 5.

c) En-Route Chart - ICAO

This chart is produced for the entire Kuala Lumpur and Kota Kinabalu FIR. The aeronautical data include all aerodromes, prohibited, restricted and danger area and the air traffic services system in detail. The chart provides the flight crew with information that will facilitate navigation along ATS routes in compliance with air traffic services procedures.

d) Standard Departure Chart - Instrument (SID) - ICAO

This chart is produced whenever a standard departure route - instrument has been established and cannot be shown with sufficient clarity on the Area Chart - ICAO.

The aeronautical data shown include the aerodrome of departure, aerodrome(s) which effect the designated standard departure route - instrument, prohibited, restricted and danger areas and the air traffic services system. This chart provides the flight crew with information that will enable them to comply with the designated standard departure route - instrument from the take-off phase to the en-route phase.

e) Standard Arrival Chart - Instrument (STAR) - ICAO

This chart is produced whenever a standard arrival route - instrument has been established and cannot be shown with sufficient clarity on the Area Chart - ICAO.

The aeronautical data shown include the aerodrome of landing, aerodrome(s) which effect the designated standard arrival route - instrument, prohibited, restricted and danger areas and the air traffic services system. This chart provides the flight crew with information that will enable them to comply with the designated standard arrival route - instrument from the en-route phase to the approach phase.

f) Instrument Approach Chart - ICAO (for each runway and procedure type)

This chart is produced for all aerodromes used by civil aviation where instrument approach procedures have been established. A separate Instrument Approach Chart - ICAO has been provided for each approach procedure.

The aeronautical data shown include information on aerodromes, prohibited, restricted and danger areas, radio communication facilities and navigational aids, minimum sector altitude, procedure track portrayed in plan and profile view, aerodrome operating minima, etc.

This chart provides the flight crew with information that will enable them to perform an approved instrument approach procedure to the runway of intended landing including the missed approach procedure and where applicable, associated holding patterns.

g) Precision Approach Terrain Chart - ICAO

This chart is produced for all runways served by Category II precision approaches.

The chart provides aircraft operating agencies with information to assess the effect of terrain in the approach path on decision height determination by the use of radar altimeter.
